Temporary Relocation of Airline Ticket Counters at FYI

FRESNO, CA – Beginning on Tuesday, June 3, 2008, some of the airlines will move their ticket counter positions into temporary locations at Fresno Yosemite International Airport to accommodate the ongoing terminal remodel. Airline ticket counters included in this phase of the remodel will relocate to other existing ticket counter positions located throughout the terminal lobby. In approximately six months, the airline ticket counters will again shift positions to allow for the next remodel phase.

To minimize the impact to customer inconvenience, signage at both terminal lobby entrances as well as internal signage will direct passengers and guests to airline ticket counters and gates.

When completed next summer, the remodeled terminal lobby will feature raised ceilings with efficient lighting, intuitive way-finding throughout the terminal, the consolidation of the airline ticket counters along one wall, and other innovative enhancements.

Nine carriers currently offer Valley passengers approximately 50 daily departures from Fresno. FYI is a municipally owned entity operating as a self-supporting enterprise. No City of Fresno general funds are used to operate Fresno Yosemite International or Fresno Chandler Executive Airport.
